

The Family Fire Escape Plan.

Saving your family starts here !

Knowing what to do and where to go when the smoke alarm sounds, can save your lives. Take a couple of minutes with everyone at home to create your family fire escape plan, by following the instructions below.

1. Draw a floor plan of your home using the grid. Show all doors, windows and stairways, including all possible emergency exits.
2. If possible, include 2 ways out of every room.
3. Check all the windows, making sure they open easily.
4. Make sure your fire alarms are in working order. Push the test buttons to make sure of that.
5. Decide among your family members, if anyone needs assistance with escaping and who will assist them.
6. Choose a meeting place outside at a safe distance from your home and mark that on your escape plan.
7. In case of an emergency call the fire department once you are outside your home and have safely escaped.
8. Practice your escape to know how long it would take and to get familiar with all possible escape routes.
